

SYNESTHESIA

AN INFORMAL EXPERIMENT ON ORDINARY PEOPLE

Around fifty people answered an online test in which every number from zero to nine was asked to be defined as a color from a closed list. "None of them" was also proposed as a valid answer, despite this, it wasn't the most marked response.

ABSOLUT FREQUENCES:

DOMINANTS BY NUMBER:

1 **2** **3** **4** **5** **6** **7** **8** **9** **0**

DISTRIBUTION:

SOME TIPS:

65 answered the test up to now

"none of them" was selected just **15%** of times

0 is almost clear: black and white

people like green more than blue! **5=6=7**

8 gets the synesthetic king's prize
